

How long can the EMS wind power of the communication base station be stored before it can be used

Overview

What CTCSS tone do EMS med radios use?

For this reason, all New Mexico EMSCOM UHF radios on the EMS MED channels should be using CTCSS tone 136.5. Types of Stations: A base station transmits directly to mobiles and portables. If the base station is at some distance away from the operator, it is known as a remote base station.

What are the main functions of the EMSCOM system?

The EMSCOM system's main functions are to provide communications between ambulance/rescue and hospital emergency rooms to allow notification of incoming injured patients to health care facilities.

What is the purpose of the EMSCOM manual for?

This manual is provided for the use of all services that may have occasion to use the New Mexico Emergency Medical Services Communications (EMSCOM) System. The intended purpose of the manual is to provide a basic understanding of the capabilities and proper utilization of the State EMSCOM system. Maintenance policies are also included.

How do I use the EMScom system?

When using the EMScom system, always identify whom you are calling, give your unit number, name of service, and the repeater in use. For example: 'Mobile to base - Call up using a repeater transmission route.'

What is the New Mexico EMScom system?

The New Mexico EMSCOM System is a radio communication system that operates on the UHF (ultra-high frequency) radio band and is licensed Radio Service (EMRS) frequencies under the Federal Communications Commission (FCC).

What is the Santa Fe EMS system?

The Santa Fe EMS system is a priority system in cases of emergency radio communications traffic. Santa Fe Control can assist any EMS provider as needed during an emergency and can dispatch EMS for any area upon request by State Police, Sheriff, or private parties.
