

# **How many days does it take for an outdoor power supply to pay back**

## Overview

---

How long does it take for solar panels to pay back?

So, if it takes 10 years to recover the cost of your solar panels, you can still expect savings on your electric bills for another 15 years, which is an excellent investment. Solar companies can provide you with an estimate of your payback period.

How long does it take to recoup solar energy?

Switching to solar energy is a major financial commitment and, if you're like most homeowners, you'll want to know how long it will take to recoup your investment. This average recovery time, called the solar panel payback period, typically ranges from six to 10 years, depending on a handful of factors.

Do you need a payback period for solar?

With a solar loan or a lease or PPA, you often don't need to provide any cash upfront. While you'll save less money in the long run by paying for solar with a loan or lease, assuming your monthly solar payments are less than what you currently pay for electricity, you won't have a payback period.

How long does it take for electricity to come back?

But occasionally, unforeseen circumstances, mishaps, and emergencies can result in non-payment. This, in turn, can lead to the temporary disconnection of power, leaving consumers wondering: how long does it take for electricity to come back on after paying the bill?

It may take 1-48 hours for your power to be reconnected.

How long does solar payback last?

Payback periods vary significantly by state, depending on the availability of incentives, the cost of solar, and the cost of electricity. Remember: Solar

payback periods will extend 43% longer—or up to 8 years—starting January 1, 2026, when the federal solar tax credit disappears.

How long does it take a solar system to pay off?

The average solar payback period for EnergySage customers is currently just over seven years. However, without the federal tax credit, that same system would take over 10 years to pay for itself. Here's what you need to know about how long it's likely to take you to break even on your solar energy investment—and why timing matters.
