

# **How many power base stations are there in Paraguay**

## Overview

---

Responsibilities in the Paraguayan electricity sector are concentrated in a single, vertically integrated public monopoly, the National Electricity Administration (Administración Nacional de Electricidad, ANDE). Law 167/93 indicates that the Vice ministry of Mines and Energy (under the Ministry of Public Works and Communication) is responsible for establishing and guiding energy policy, as well as.

Paraguay has no proven reserves, and it neither produces nor consumes natural gas. In recent years, the country has sought to promote the consumption of natural gas as a way to decrease the use of firewood and charcoal, which has contributed to deforestation in the country. However, barriers to natural gas consumption include a lack of domestic natural gas production and the absence of import pipelines.

How many hydroelectric dams does Paraguay have?

Paraguay operates two binational hydroelectric dams. Itaipu dam, by far the largest power station in the country, is operated with Brazil and has an installed capacity of 7000 MW (86 percent of Paraguay's generation capacity).

How much electricity does Paraguay produce?

Paraguay generated 51.8 terawatt-hours of electricity in 2004, while consuming only 3.1 TWh. Almost all of the country's electricity production comes from a single facility, the bi-national Itaipu dam. Paraguay is one of the world's largest net exporters of electric power.

How is energy sourced in Paraguay?

Energy in Paraguay is primarily sourced from hydropower, with pivotal projects like the Itaipu Dam, one of the world's largest hydroelectric facilities. This reliance underscores the need for a robust infrastructure, including efficient transmission networks and distribution systems, to leverage the country's renewable resources fully.

Who controls the electricity market in Paraguay?

The National Electricity Administration (Administración Nacional de Electricidad, ANDE), Paraguay's state-owned utility, controls the country's entire electricity market, including generation, transmission and distribution.

Why should Paraguay integrate into the South American power market?

Integration into the South American power market is crucial for Paraguay, enhancing regional energy trade and cooperation. This integration is anticipated to yield significant economic benefits through energy exports and bolster regional energy security.

Why does Paraguay have a poor electricity system?

However, despite the abundance of resources, the Paraguayan electricity system faces difficulty due to the lack of investment in transmission and distribution networks. In addition, distribution losses are among the highest in the region.
