

How much is the price of a single photovoltaic panel

Overview

As of 2025, the average cost of residential solar panels in the U.S. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2.50 to \$3.50 per watt of installed capacity (more on price per watt below). How much does it cost to install solar panels?

Find a solar panel installer near you to get an estimate for your home. An average 1,500 square foot home will likely need 16 panels to cover its electric usage. If your home is shaded or faces east/west, you might need more than 16 panels. While panels themselves cost \$0.70 to \$1.50 per watt, the price to install solar panels costs \$3.20 per watt.

How much does a 12 kW solar panel cost?

The average cost of a 12 kW solar panel installation on EnergySage is \$20,754 after the federal tax credit. You'll probably save anywhere from \$34,000-\$120,000 over 25 years by going solar. Solar panels are just 12% of the total cost of a solar panel installation.

How much does it cost to clean solar panels?

Solar panels require very little upkeep. If you're able to clean the solar panels yourself, the only maintenance cost will be the water used to hose them down. If you hire a professional to clean your solar panels, it will cost around \$100 to \$350, on average.

How much does a CPV solar system cost?

Concentrated photovoltaic (CPV) panels are \$0.80 to \$1.10 per watt. While not as well-known as other types of panels, CPV panels are highly efficient and may grow in popularity. A 6 kW solar system would cost \$4,800 to \$6,600. A single solar cell costs about \$0.30 and most panels use 60 or 72 cells. The more cells in a panel, the higher the cost.

Are monocrystalline solar panels expensive?

Currently, monocrystalline panels are the most cost effective. While they are the most expensive, they are also the most efficient (which helps you save the most money). What are the three types of solar panels?

.

How much electricity does a solar panel produce?

The amount of electricity a solar panel produces is measured in watts and kilowatts (1,000 W = kW). A kilowatt-hour (kWh) measures the amount of energy that a solar panel produces. Keep in mind, most homes need at least 10 to 20 panels to cover their electricity. There are four main types of solar panels:
