

# How much wind power is available at Turkey s mobile energy storage sites

#### **Overview**

Does Türkiye have a strong wind energy capacity?

In 2024, Türkiye's wind energy capacity grew by only 6.5% (+770 MW), marking a significant slowdown compared to the peak annual additions of 1.7 GW in 2021.

Does Türkiye have storage-integrated solar power?

In the area of storage-integrated solar power, Türkiye is making significant progress. As of 2024, 412 solar power plants with storage, representing a combined installed capacity of over 14 GW, have received pre-licenses. This figure far exceeds the 2.1 GW storage capacity target set in the NEP for 2030.

How big is Türkiye's energy storage capacity?

Türkiye's 35 GWh storage capacity accounts for grid-scale projects alone. Global energy storage investments have surpassed 150 GWh. Türkiye has already begun installations in Hungary, Bulgaria, and Spain, leveraging its geographic advantage close to Europe.

Are storage-integrated power plants possible in Türkiye?

While no grid-scale storage-integrated power plants are operational in Türkiye yet, the country has a robust pipeline of approximately 33 GW of storage-integrated wind and solar projects with pre-licensing periods extending until 2030. This strong investor interest highlights the potential of storage-integrated power plants.

Does Turkey have a Solar Energy Breakthrough?

Turkey's solar energy breakthrough The facilitation of self-consumptionfocused power plant installations in Türkiye has accelerated annual new installations, pushing solar energy capacity beyond the current 2025 target. Türkiye's solar energy capacity doubled from 9.7 GW in July 2022 to exceed 19 GW by the end of 2024.

#### Why do wind farms use MTU batteries?

When the wind is strong and the turbines in the wind farm generate more electricity than the grid can absorb, the surplus energy is stored in the mtu battery systems. This prevents grid congestion at times when a lot of electricity is available.

### How much wind power is available at Turkey s mobile energy storage
