

How to store batteries

Overview

How do you store a battery?

The safest and most effective way to store batteries is to use an organizer explicitly made for them. As the home organization trend increases, more and more of these types of containers are popping up on the shelves. Some organizers are larger and even include a battery tester, which can be helpful if you have a lot of batteries.

How do you store a 9v battery?

It's also a good idea to get some plastic 9V battery protectors which cover the posts and prevent accidental contact. Another option is to cover the posts with electrical tape while in storage. As easy as it may be to have a dedicated "battery drawer" or to store loose batteries in a plastic zipper bag together, it's not a great idea.

Can you store a battery in a plastic bag?

As easy as it may be to have a dedicated "battery drawer" or to store loose batteries in a plastic zipper bag together, it's not a great idea. Batteries can easily come into contact with each other, which can cause a short circuit, or at the very least cause them to discharge and become drained.

How to store lithium ion batteries safely?

1. Storing Lithium Ion Batteries at The Right Temperature. The typical lithium ion battery storage temperature range of a home or storage unit is usually storing lithium batteries safely. The range of safe storage temperatures is wide, as shown in the chart below. However, issues like decreased battery lifespan occur in extreme weather conditions.

Is storing a battery a good idea?

Storing batteries is all well and good until you need to dispose of a battery safely. To get a sense of best practice of battery disposal, we spoke to David

Klanecky, CEO of Cirba Solutions, which specializes in end-to-end battery recycling.

Can you store different types of batteries together?

If you are not using a storage container like the Battery Daddy that separates each battery, storing different types of batteries together, like mixing lithium and alkaline, can lead to poor performance or even leakage. It's best to store batteries by type and label your storage container so you don't accidentally mix them.
