

Huawei 4G communication base station inverter purchase price

Overview

What is a base station in 4G?

Base station is a radio receiver/transmitter that serves as a hub of the local wireless network and may also be the gateway between a wired network and the wireless network. In the 4G communication era, base stations can generally be divided into three parts: BBU (baseband processing unit), RRU (remote radio unit) and antenna feeder unit.

Who makes 4G base station?

The main manufacturers of Global 4G Base Station include Huawei, Ericsson, Nokia, etc. These top three manufacturers hold a market share about 80%. Europe and China are the main production regions in the world. This report is a detailed and comprehensive analysis for global 4G Base Station market.

What is the global 4G base station market size?

According to our (Global Info Research) latest study, the global 4G Base Station market size was valued at USD 13880 million in 2022 and is forecast to a readjusted size of USD 3111.3 million by 2029 with a CAGR of -19.2% during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Which countries use 4G base station?

Brazil 4G Base Station Consumption Value and Growth Rate (2018-2029) & (USD Million) Figure 63. Argentina 4G Base Station Consumption Value and Growth Rate (2018-2029) & (USD Million) Figure 64. Middle East & Africa 4G Base Station Sales Quantity Market Share by Type (2018-2029)
