

Huawei Lithium Battery Pack Professional

Overview

What is Huawei smartli lithium battery UPS?

For medium- and large-sized DC and industry critical power supply Huawei SmartLi Lithium Battery UPS provides reliable, high-performance energy storage, offering scalable and efficient backup power solutions for critical systems with enhanced safety and long-term sustainability.

What is Huawei smartli ups?

Huawei SmartLi UPS is a Li-ion battery power system designed for data centers. Wuhan AI Computing Center was completed within 120 days, halving the rollout time. The PUE is as low as 1.25, and the annual power saving exceeds 3.4 million kWh Max. Number of Cabinets Connected in Parallel10.

What is a lithium battery & how does it work?

Lithium batteries provide backup power. When the mains is normal, the UPS charges batteries. When the mains fails, lithium batteries supply power to the UPS. 100 A/100 A@35°C (The actual charge current depends on the UPS charge capability.).

What is a smart lithium battery?

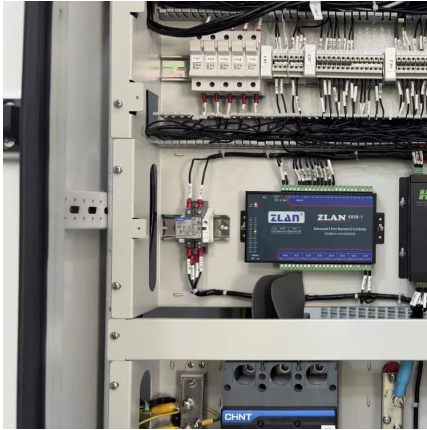

The SmartLi provides lithium battery cell short-circuit detection and alarm functions to ensure the safe operation of lithium batteries. High energy density reduces the footprint compared with lead-acid batteries. The intelligent BMS reduces routine O&M costs.

How long does a lithium ion battery last?

Long service life: The service life of a lithium-ion battery is two or three times that of an ordinary lead-acid battery. The battery state of health (SOH) and state of charge (SOC) can be monitored online in real time, improving the reliability of site power backup.
