

# Huawei Xianhui pack battery

## Overview

---

Does Huawei have a sulfide battery?

Huawei Huawei has filed a patent detailing a sulfide-based solid-state battery design with energy densities between 180 and 225 Wh/lb, roughly two to three times higher than today's typical electric vehicle batteries.

Is Huawei developing a solid-state battery?

According to the patent, Huawei is developing a solid-state battery architecture with an energy density between 400 and 500 Wh/kg—reportedly three times higher than that of conventional lithium-ion cells used in today's electric vehicles.

What are the features of Huawei's new battery?

There are a number of features of the Huawei's new battery worth mentioning: Like many battery solutions on the market Huawei have opted for a modular design for their batteries – this enables greater scale in production and more flexibility for consumers.

How many miles can a Huawei battery charge?

Huawei promises that its battery technology could deliver around 1,864 miles of range and achieve a 10% to 80% charge in under five minutes.

Can a Huawei battery power a blackout?

With the inclusion of their back up box, Huawei's battery can provide power during a black out with an output up to 5kW on single phase and 3.3kW on three phase. With a number of recent grid outages across Australia this has become an important consideration for buyers of solar batteries. How much do Huawei batteries cost?

.

How long does a Huawei battery last in Australia?

Compare quotes from up to 7 installers in your area now. Like most battery solutions in Australia Huawei offer a 10 year warranty for their battery. For each 5kWh module there is a life cycle power discharge of 16.45MWh stated in the warranty document with an estimated 60% capacity at end of life.
