

Hungarian energy storage system subsidies

Overview

Transmission system operators and distribution companies in Hungary can apply for non-refundable subsidies totalling 58 billion Hungarian forints (155 million euros) to build energy storage facilities in a bid to strengthen the country's security of supply and promote the further expansion of renewable energy sources. Will Hungarian energy storage projects get subsidy support?

The Hungarian Ministry of Energy has announced that around 50 grid-scale energy storage projects with a cumulative capacity of 440 MW have received subsidy support through a tender launched in February this year.

Does Hungary need a state aid energy storage scheme?

The national funding will support the installation of 800MW of large-scale electricity storage. Hungary seeks to increase storage capacity in order to offer greater grid flexibility. Credit: Dorothy Chiron via Shutterstock. The European Commission has approved a €1.1bn (\$1.2bn) state aid energy storage scheme from the Government of Hungary.

How much does Hungarian government spend on energy storage projects?

The Hungarian government has allocated HUF 62 billion (EUR 158 million) for energy storage projects with an overall 440 MW in operating power. Hungarian authorities launched the tender for grid-scale batteries on January 15 and received offers until February 5. The winning bidders were selected a few days ago.

Will Hungary support the installation of new electricity storage facilities?

Hungary notified to the Commission, under the Temporary Crisis and Transition Framework, a Hungarian scheme to support the installation of at least 800 MW/1600 MWh of new electricity storage facilities.

Why is EU funding 800MW of energy storage in Hungary?

The EU has approved a \$1.2bn state aid funding package for 800MW of energy

storage in Hungary as the country seeks to up its renewables.

Will Hungarian electricity storage facilities support a net-zero economy?

The European Commission has approved a €1.1 billion (approximately HUF 436 billion) Hungarian scheme to support electricity storage facilities to foster the transition to a net-zero economy.
