

Hungary and Huijue cooperate on energy storage project

Overview

How much does Hungarian government spend on energy storage projects?

The Hungarian government has allocated HUF 62 billion (EUR 158 million) for energy storage projects with an overall 440 MW in operating power. Hungarian authorities launched the tender for grid-scale batteries on January 15 and received offers until February 5. The winning bidders were selected a few days ago.

Will Hungarian energy storage projects get subsidy support?

The Hungarian Ministry of Energy has announced that around 50 grid-scale energy storage projects with a cumulative capacity of 440 MW have received subsidy support through a tender launched in February this year.

What is Huijue's home energy storage solution?

Huijue Group's Home Energy Storage Solution integrates advanced lithium battery technology with solar systems. Ranging from 5kWh to 20kWh, it caters to households of varying sizes. It reduces electricity bills and serves as emergency backup power, providing a seamless, intelligent, and one-stop energy solution.

What is Hungary's largest energy storage facility?

Hungary's largest energy storage facility is currently under construction near Szolnok, with Chinese company Huawei involved in the solar energy project. The contract was signed in February, with MAVIR Ltd. as the investor. According to portfolio.hu, the project is estimated to cost HUF 8.5 billion (EUR 21 million), with a capacity of 60 MWh.

How will a €1.1 billion Hungarian measure affect electricity storage capacity?

This €1.1 billion Hungarian measure will facilitate the development of electricity storage capacity. The Hungarian electricity system will be more flexible. The preparation for a higher integration of renewables into the

electricity mix, is in line with EU climate and energy targets.

Will Hungary support the installation of new electricity storage facilities?

Hungary notified to the Commission, under the Temporary Crisis and Transition Framework, a Hungarian scheme to support the installation of at least 800 MW/1600 MWh of new electricity storage facilities.
