

India solar container exports

Overview

India's export dynamics compound domestic supply concerns. The country exported 5.8 GW of modules in 2024—triple the previous year—with 97% going to the United States. But rising US tariffs, set to hit 64% by August's end, threaten this crucial export market. Can India expand its Solar Exports?

This shift in trade dynamics, coupled with rising global demand for solar panels, has opened new avenues for India to expand its exports. However, China's dominance in solar manufacturing, supported by its ability to produce solar cells and modules at lower costs, remains a challenge for Indian exporters.

Does India import solar cells from China?

for the U solar supply chain?

. May 2024. In Fiscal Year (FY) 2024, India imported a record US\$6.2 billion worth of PV cells and modules from China-based manufacturers.³ Interestingly, in the past few years, India has experienced a significant increase in PV exports, primarily high-

How is India's solar PV industry transforming?

st19 when deployed in projects. Developers also highlight that the exported modules are of superior quality and have a different bill of materials sold domestically. Conclusion India's solar PV industry is transforming – it is evolving from a major import r to an exporter of PV modules. Indian PV exports (by value) have risen 23x in just two.

Which country exports the most solar products to India?

China remained the dominant supplier of solar products to India, accounting for 78.1%. Vietnam was the second-largest supplier, with a 9.8% share, followed by Hong Kong at 5.6%. Other suppliers include Indonesia, the U.S., and Thailand, which exported 4%, 1.3%, and 0.8% of solar products to India, respectively.

Is India a net importer or exporter of photovoltaic (PV) products?

India is making significant progress in transitioning from a net importer to a net exporter of photovoltaic (PV) products. In Fiscal Year (FY) 2024, Indian PV manufacturers exported approximately US\$2 billion worth of PV modules. The export value of PV modules from India increased by more than 23 times in just two years between FY2022 and FY2024.

Does India export photovoltaic modules?

The export of Indian photovoltaic (PV) modules has risen exponentially by more than 23 times between Fiscal Year (FY) 2022 and FY2024, primarily to the US, which accounted for more than 97% of India's exports in both FY2023 and FY2024.
