

Inverter manufacturers in New Zealand

Overview

What types of solar inverters are available in NZ?

There are different types of inverter available. This includes inverters that can connect to the electricity grid based on your home's connection. One of the most common types of solar inverter in use in NZ, however, is the hybrid inverter.

Who are Sungrow solar inverters?

A global inverter and storage manufacturer with a complete range of products for solar and storage projects in Australia and New Zealand. Sungrow make a complete range of solar inverters and energy storage products for residential, commercial, industrial and utility grade solar projects.

Who should install a solar inverter?

Solar inverters should always be installed by a professional installer, like ZEN Energy, with experience in solar energy systems. Attempting to install a solar inverter yourself could be dangerous and may also result in damage to the inverter, the solar panels, or other components of your solar energy system.

What is a victron Energy Phoenix inverter?

Victron Energy Phoenix Inverters. Pure sine wave output, high peak power and high efficiency. Combined high frequency and line frequency technologies ensure the best of both worlds: smooth sine wave and rugged design. 12/24/48 Vdc models with 230 or 120 Vac output. (Please contact us for 120 Vac Models).

Who are Fronius inverters?

Fronius Inverters are a world leader in solar technology and one of New Zealand's most sought after and reputable inverters. Founded in Austria in 1945, they have over 65 years' experience producing innovative and intelligent power storage solutions.

What are the different types of solar inverters?

String Inverters: This type of inverter is the most common and cost-effective option. It is installed in a centralised location and connects to multiple solar panels in series. Micro-inverters: Micro-inverters are installed on each individual solar panel and convert the DC power generated by the panel into AC power.
