

Iranian solar power home manufacturer

Overview

Who makes solar cells in Iran?

This knowledge enterprise company, as the first producer of solar cells in Iran, has established production lines for various types of cells, including Half-Cell and Full-Cell, using precise and advanced equipment at its Khomein site. Currently, Mana Energy Pak's solar cell production capacity stands at 1,500 MW per year.

What types of solar panels are produced by Mana energy pak?

Clarity, Mana Energy Pak's solar panels are produced in various types, including monofacial and bifacial, with power outputs ranging from 300 to 700 watts. These panels are manufactured per the latest technologies such as TOPCon and PERC.

How many solar cells does mana energy pak produce a year?

Currently, Mana Energy Pak's solar cell production capacity stands at 1,500 MW per year. The produced cells undergo rigorous testing and automatic monitoring to ensure performance quality in compliance with global standards. The solar cell is the primary component used in photovoltaic panels responsible for converting solar energy into electricity.
