

Irish Energy Storage Fire Systems Company

Overview

What is energy storage Ireland?

Energy Storage Ireland is a representative association of public and private sector organisations who are interested and active in the development of energy storage in Ireland and Northern Ireland. Delivering the energy storage technologies to enable a secure, carbon free electricity system on the island of Ireland by 2035.

Does SSE have a battery storage system in Ireland?

SSE has grown its secured battery energy storage system (BESS) pipeline in Ireland to 300MW with the acquisition of the 120MW/240MWh Thornsberry BESS project near Tullamore, County Offaly. Pictured is the company's 50MW battery storage facility in Wiltshire, England.

Will SSE Renewables build a battery energy storage system in Ireland?

SSE Renewables has acquired the project development rights for a 120 MW/240 MWh grid-scale battery energy storage system (BESS) project in Ireland's Midlands from UK-based renewable energy company Low Carbon which, if approved for final delivery, could be constructed and operational by the end of decade.

Are battery storage projects energised in Ireland?

The storage sector in Ireland has been heating up, in 2020 its first large-scale battery storage projects were energised, with Statkraft completing its 11MW Kerry battery storage project in January 2020, the first utility-scale battery project in the country.

Will Ireland reach 70% renewable electricity by 2040?

Ireland is aiming to reach 70% renewable electricity by 2030 and as a Member State of the European Union (EU), submitted a draft National Energy and Climate Plan (NECP) in December last year aimed at bringing it in line with EU

greenhouse gas (GHG) emissions targets. ESB itself is targeting net zero emissions from its activities by 2040.
