

# Japan s solar panels photovoltaic power generation

#### **Overview**

Although conventional PV is no longer mass-produced in the country, Japan has been investing in perovskite solar cell technology in recent years, a technology invented by Tsutomu Miyasaka.

Solar power in Japan has been expanding since the late 1990s. Japan is a large installer of domestic, with most of them grid connected. The country was a major manufacturer and exporter of photovoltaics (PV).

Feed-in tariffThe Japanese government is seeking to expand solar power by enacting subsidies and a (FIT). In December 2008, the announced a goal of 70% of new homes having solar.

• (, JPEA) • (in Japanese) • .

In the 2000s, Japanese manufacturers and exporters of included , , , , , .
