

Kosovo Lithium Energy Storage Project

Overview

Let's face it: Kosovo's energy grid has been running on caffeine and hope for years. With 85% of its electricity from aging coal plants and frequent blackouts during peak demand, the country needed a lifeline—fast. Enter the 200MWh battery storage project, funded by a \$234 million U.S. grant [1] [2]. Will Kosovo build a battery energy storage system?

The government of Kosovo will build a battery energy storage system (BESS) with a capacity of 200MWh-plus to deal with the energy crisis.

Who owns the energy facilities in Kosovo?

Kosovo* will own the facilities, the ministry added. Economy minister Artane Rizvanolli said the program would back the independence of the national energy system and enable its transformation. The details will be made known after negotiations between the government and MCC, planned for May.

How will Kosovo's Energy System work?

The system will stabilize the fluctuating frequency of electricity, store energy in the early hours of the morning when consumption is low, and connect with solar, wind, or similar power plants. Kosovo* will own the facilities, the ministry added.

How much does a grant to Kosovo cost?

The compact program for a grant to Kosovo*, estimated at USD 234 million, consists of two projects: batteries with an installed capacity of 200 MWh, and the development of the workforce and involvement of women in the energy sector, the Ministry of Economy said.
