

Kyrgyzstan s containerized energy storage policy regulations

Overview

What are the objects of regulation in Kyrgyz Republic?

According to the law, objects of regulation are: “production, consumption, and sale of heat, electric energy and fuel using renewable energy sources, as well as the production and supply of equipment and technologies in the field of renewable energy source” (Ministry of justice of the Kyrgyz Republic, 2008).

What is Kyrgyz energy policy?

Outlook to the Kyrgyz energy policy To unleash the RE capacity, the Kyrgyz government introduced the law titled “Renewable energy sources (RES)” in December 2008 (Ministry of justice of the Kyrgyz Republic, 2008). Kyrgyzstan was the first country in Central Asia who implement RE-based law.

Why is energy policy important in Kyrgyzstan?

The current energy policy is considered as one of the key barriers to the developing the renewable energy sector in Kyrgyzstan. Hence, there is an immediate need to evaluate the formulated energy policy to investigate gaps and uncertainties.

Does Kyrgyzstan need heating?

Because of the country's geographical features, the energy need for domestic space heating is a key priority as compared to the energy need for lighting and cooking in Kyrgyzstan (IEA, 2020). Due to the long and harsh winter (-25 to -30°C in the mountainous areas), heating is a primary need for local people.

Does Kyrgyzstan have energy allowances?

allowances cover energy bills based on the actual energy consumption. The budget legislation of Kyrgyzstan does not allow state and local authorities to use achieved energy efficiency measures. Energy Efficiency Requirements for Public Procurement The State Programme on Energy Savings and EE Policy for

2015-201755 provides fo.

What is the energy-saving potential in Kyrgyzstan?

market, economic and technical energy-saving potential in Kyrgyzstan. The market potential, as of 2013, is estimated at the level of 0.5 Mtce, whereas the total technical energy efficiency potential
