

# Large-capacity outdoor energy storage lithium battery source factory

#### **Overview**

Where is China's largest Bess battery factory located?

China's EVE Energy has announced the official launch of the first phase of its 60 GWh battery energy storage factory in Jingmen City, Hubei Province. The facility unveiled on December 10 is considered the world's largest BESS manufacturing plant. It is also the first factory to mass produce 600Ah+ high-capacity battery cells.

Why is EVE Energy building a super energy storage plant?

The 60GWh Super Energy Storage Plant Facilitates Mass Production To support the mass production of Mr. Big's large battery cells, EVE Energy is committed to building a world-class super energy storage plant.

What are the advantages of large-capacity battery cells?

The advantages of large-capacity battery cells lie in their ability to reduce the cost and integration complexity of energy storage systems, improve energy density and safety, and reduce the use of components in the PACK stage, thus simplifying the assembly process and further lowering costs.

How many batteries can a factory produce a day?

The factory's production line can achieve an average output of 1.5 battery cells per second from material feeding to finished batteries; it completes four entire battery packs in one minute and produces over 40 containers of 5MWh daily.
