

Lesotho Communication Base Station Photovoltaic Power Generation System Factory

Overview

Who is constructing a solar power plant in Lesotho?

The government has also engaged China Sinoma International Engineering and TBEA Xinjiang New Energy to construct solar power plant that will produce 70 MW. Lesotho Electricity and Water Authority (LEWA) Lesotho Electricity Company (LEC) Lesotho Highlands Development Authority (LHDA).

How will solar power Help Lesotho improve its energy structure?

The project will help Lesotho optimise its energy structure by cultivating solar power expertise to improve the economy and Basotho's livelihoods. The first phase of the project will supply the national power grid with 30MWp of electricity; while the second phase will have a capacity of 40MWp.

How much electricity does Lesotho generate?

Lesotho currently generates electricity through the Muela Hydro Power Station which only provides 72MW and this is not enough to meet the country's base load estimated at 160MW. The situation is even worse during peak hours, especially in winter.

Who is responsible for the operation and maintenance of Lesotho electricity generation company?

The Lesotho Electricity Generation Company, as the operator of the project, will take over the operation and maintenance of the project after the completion of the project. At that time, the contractor plans to train the engineers of LEGCO in operation and maintenance so that they can be competent for the work.

What is LSP construction doing in Lesotho?

LSP Construction constructed the first ever Solar Farm in Lesotho in the Mafeteng District at Ha-Ramarethole. Two Phases, Phase I - 30MWp and Phase II - 40MWp. Phase I currently in progress: Expansion of the Ha-Ramarothole

substation. Erection of a new 55 km 132kV overhead transmission line from Ha-Ramarothole to Ha-Mofoka.

Can Lesotho export wind power?

Breeze Power, a company owned jointly by GOKL and Harrison & White Investments, is investigating twelve sites for wind power generation. Energy demand is growing in South Africa and the rest of the region, and Lesotho has the potential to export renewable power.
