

Lithium battery foreign trade battery cabinet

Overview

Should lithium batteries be reliant on one supplier?

As policy is changing all of the time, it's good for companies to not be reliant on one supplier for all of their lithium battery supply needs. Trade wars also open the door for emerging territories to enter competition, such as India and Southeast Asia. Policies can also specifically target tech, a highly priced and heavily used consumer good.

Where are lithium ion batteries sourced?

The lithium-ion battery cells are sourced from either China, Japan, or South Korea. 19 C.F.R. § 134.1 (b) defines country of origin as: “. the country of manufacture, production, or growth of any article of foreign origin entering the United States.

Should you buy lithium batteries today?

Lithium batteries have become an increasingly important global product, and global policy has reflected as such, as nations will always leverage each other however they can. Tomorrow's policy is never certain, so make the purchases you want today in case policy changes for the worse.

Do countries impose export restrictions on lithium?

To give domestic companies a competitive edge, nations often impose export restrictions on raw materials such as lithium, cobalt, and nickel. This is particularly true with a few of the world's biggest lithium-producing nations, such as China, certain countries in Africa, and Chile.

What materials are used for lithium batteries?

The most important materials used for lithium batteries—such as lithium, nickel, and cobalt—are often mined and exported from other countries. In order to encourage the use of domestic materials and keep money within borders, nations impose tariffs on imported goods.

Why is the lithium-ion battery market growing so fast?

The global lithium-ion battery market is growing faster than ever, led largely by a rise in demand for EVs, portable electronics, and grid energy storage. This rapid market growth has led to a spike in international production and distribution, which naturally has drawn the attention of local governments and governing international organizations.
