

Mauritius suitable for lithium battery inverter

Overview

Why is battery energy storage system being introduced in Mauritius?

The CEB is introducing a Battery Energy Storage System (BESS) on its network to arrest the fluctuation inherent to Variable Renewable Energy (VRE) systems. This is due to the increasing share of VRE in Mauritius' energy mix, as the country's energy transition to a low carbon economy gains momentum.

Are solar panels a good investment in Mauritius?

Tax Incentives: In Mauritius MRA offers tax credits to encourage the adoption of solar energy. These incentives can help reduce the upfront cost of installing solar panels, making them more financially attractive. **Low Maintenance:** Solar panels are relatively low maintenance.

What is Mauritius' long term energy strategy?

The Government of Mauritius' Long Term Energy Strategy 2009-2025 aims to increase the share of renewable energy in our energy mix to 35% by 2025. This includes reducing the country's dependence on coal and heavy oil for electricity generation.

How will Mauritius transition to a low carbon economy?

Mauritius is transitioning to a low carbon economy, with the Central Electricity Board (CEB) installing the first grid-scale Battery Energy Storage System (BESS). This is the first of its kind in Mauritius and enables high capacity storage of renewable energy in the grid.

How can I make Mauritius more eco-friendly?

By the way: CEB's Carbon footprint is still over 80% fossil so taking action yourself can help accelerate Mauritius to become more eco-friendly. This kit is ideal for small Mauritian households with 2 air-conditioning devices, refrigerator, washer and a water pump.

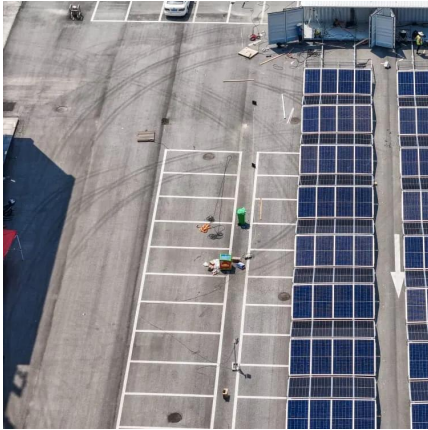

What is Mauritius aiming to reduce dependence on?

The Government of Mauritius' Long Term Energy Strategy 2009-2025 aims to increase the share of renewable energy in our energy mix to 35% by, reducing the country's dependence on coal and heavy oil for electricity generation.
