

# **Mexican Battery Energy Storage Company**

## Overview

---

Does Mexico have a battery industry?

Mexico's battery industry continues to grow rapidly, with leading manufacturers providing energy storage solutions for a variety of sectors, including automotive, industrial, and renewable energy sectors in Mexico.

Are battery units a 'energy quality service'?

Battery units can also help industrial users adhere to new, stricter grid codes which cost 2-10% of a company's net revenue if not met – an offering Fajer calls 'energy quality services'. Quartux buys its battery cells and components from abroad and integrates them into energy storage systems in Mexico.

How does a battery energy storage system work?

With battery energy storage systems, corporate customers can charge when electricity prices are low and use the stored energy during peak hours, allowing energy price arbitrage and peak filling. In addition, AspenEnergy's systems provide voltage support and frequency regulation to ensure efficient operation.

What is the revolve battery storage project?

This Project is Revolve's 7th operating asset in its Distributed Generation division, operating under the name Revolve Renewable Business Solutions, and is its first battery storage system in its portfolio (See News Release dated September 15, 2022).
