

# Mobile Power Communication BESS Mobile Outdoor Communication Power Supply

### **Overview**

### What is a Bess system?

This BESS system provided the client with an energy solution that provides rapid power delivery to remote sites with the ability to leave a renewable power source connected for an extended period of time.

What is Bess & apex Energy Monitoring portal?

Suitable for a wide range of mobile communications applications including offgrid, emergency backup power, energy stabilisation and frequency response. Designed to be 'plug and play', BESS ensures swift installation and provides peace of mind. Apex Energy monitoring portal helps customers to keep an eye on multiple systems from a single location.

Do mobile Bess applications have communication interfaces?

This thesis project, carried out at Northvolt Systems, aims to analyze the existing and readily used communication interfaces for a specific set of mobile BESS applications. The analysis is performed by a literature review of typical mobile BESS applications with the identified corresponding communication interfaces.

What applications can a mobile Bess support?

The project aims to perform a thorough analysis of the various communication interfaces applicable to the applications that a mobile BESS can help support, of which, some typical VMS applications are construction sites, festivals, and EV charging stations.

How much power does a Bess have?

The system is built of two main blocks. The PCS building block, responsible for the main control of the mobile BESS. The nominal power rating of the PCS block is 225 kVA, with a maximum peak power in the peak shaving mode of 275 kW. The second block is the modular battery pack.

### What is a typical mobile Bess application?

Another typical mobile BESS application is microgrid operations. Which could be at remote locations on or ofgrid depending on operation and grid availability. Typical usages are at construction sites or event/festival areas where grid connections may be severely inadequate or underdimensioned for the usage needed.
