

Mobile base station distribution box model

Overview

What is a GMRS mobile base station?

Power up GMRS two-way radio base stations across a disaster response, farm operation, or neighborhood network for reliable communication that'll instantly reach everyone all at once. Power up your communication with Midland Radio's GMRS portable mobile base stations. These are ideal for communicating with or without radios of any model.

What are load master TM series portable power distribution boxes?

Load Master TM Series portable power distribution boxes are the first in the industry to feature outputs with adjustable current ratings to match specific application loads. These temporary power distribution boxes feature 1, 3 or 4 adjustable circuit breakers, with a range of amperage and voltage ratings.

What is a portable power distribution cart?

Portable Power Distribution Carts, also known as our Original Series of power distribution boxes, provide a safe way to distribute power to power tools and other equipment that requires power on a job site or other location where utility power is not available or turned off.

How many amps does a power distribution box have?

Our power distribution boxes range from 20-800 Amps and are well known for being durable, long lasting and safe. Load Master TM Series portable power distribution boxes are the first in the industry to feature outputs with adjustable current ratings to match specific application loads.

Are Lex power distribution boxes safe?

Lex Products offers a full range of portable power distribution boxes and units, specifically engineered for indoor and outdoor use for the entertainment, industrial and military industries. Our power distribution boxes range from 20-800 Amps and are well known for being durable, long lasting and safe.

What is a mobile substation?

A surge protection system that protects the mobile substation from lightning strikes and other voltage surges. A cable connecting system that connects the mobile substation to the power source and the load using flexible cables and connectors. Mobile substations are tailored to meet the specific needs of each customer and application.
