

## Mongolia Southern Power Grid Energy Storage Project

#### **Overview**

The proposed project aims to install the first large-scale advanced battery energy storage system (BESS) in Mongolia to (i) supply clean peaking power that is charged by renewable energy electricity, which is otherwise curtailed; and (ii) provide regulation reserve to integrate additional renewable energy capacity in the transmission grid.

## Mongolia Southern Power Grid Energy Storage Project

## Mongolia s new energy storage plant is operational

Designed with an overall installed capacity of 16 million kilowatts, the massive solar-plus-storage project will feature 8 gigawatts of solar power and 4 GW of wind power upon completion, as ...
