

Morocco and Energy Storage Policy

Overview

Who is responsible for electricity storage in Morocco?

Electricity storage in Morocco falls within the scope of competence of the Ministry of Energy, Mines, Water and Environment. ONEE is in charge of the production, the transmission and the distribution of electricity.

How is energy storage defined in Morocco?

Electricity storage is not separately defined in the Moroccan legislative framework. The rules concerning the issue of energy storage are to be found in the law applicable to the production of electricity.

How can Morocco improve its energy security?

As a net energy importer seeking to improve its energy security, Morocco has stepped up initiatives to achieve a level of domestic energy sovereignty. This includes following guidelines for transitioning to cleaner energy sources, with an emphasis on diversification.

How can the Moroccan electric system achieve long-term sustainability?

However, more needs to be done for the Moroccan electric system to achieve long-term financial, energy, and climate sustainability. Moving forward, continuation of energy subsidies and tariff reform, and acceleration of the incorporation of renewables are instrumental to the success of the National Energy Strategy and NDC.

Does Morocco have a national energy strategy?

The findings from the Morocco Energy Policy MRV demonstrate that the country has made significant progress on the implementation of its National Energy Strategy. The effort has so far resulted in electricity demand saving, more renewable energy generation, and significant emission reduction.

What are the challenges faced by electricity storage in Morocco?

Electricity storage is still at a development stage in Morocco and therefore faces the following challenges: Lack of a specific legislation regulating electricity storage – the question of storage will be dealt on a case by case basis.
