

Multi-function charging inverter price

Overview

What is a multi-functional inverter/charger?

This is a multi-functional inverter/charger, combining functions of inverter, solar charger and battery charger to offer uninterruptible power support in portable size.

What is a utility Charger inverter?

This utility charger inverter converts AC into DC to charge deep-cycle batteries. This solar power system powers home appliances and energy loads. It harnesses solar energy and optimizes battery performance. Thus, it reduces reliance on traditional energy sources. This reduces the carbon footprint.

What is a hybrid power inverter charger?

All in one solar inverter allows you to power up multiple loads, such as office equipment and major household appliances. Let's power it up together! The hybrid power inverter charger outputs continuous stable pure sine wave by wave phase-detection that is more reliable to provide clean power and low interference to your devices.

What is an inverter controller?

The inverter controller outputs the more stable pure sine wave, and output can be powered by utility directly or powered by battery or PV in battery mode. Perfect for an air compressor, fridge, freezer, microwave oven, electric saw, hairdryer, computer, etc.

What is a 48V MPPT inverter?

It has continuous DC AC power for versatile charging of your car. Unlike traditional inverters, this 48V MPPT inverter also features LCD settings. These allow you to set an adjustable input voltage range. It is especially useful for home appliances and personal computers. It is also useful for a configurable battery charging current.

How to install PV inverter/charger?

Place it in the clean conditions, and install it in well ventilated places. Please install appropriate external fuses/breakers. Make sure switching off all connections with PV array and the fuse/breakers close to battery before inverter/charger installation and adjustment. VEVOR is a leading brand that specializes in equipment and tools.
