

New Energy Battery Cabinet Production Plant

Overview

Where is Panasonic launching a new battery plant?

Allan oversees Panasonic's work at the Tesla Gigafactory in Nevada and is now directing the development of a new battery plant in De Soto, Kansas. The facility, set to become the world's largest battery plant, broke ground in November 2022 and is scheduled to begin production in 2025.

Does GM have a battery plant?

The automaker in April 2023 announced a joint venture with Samsung SDI to build a new battery plant in the United States. Aside from volume production, GM has also partnered with startup SolidEnergy Systems in 2021 to build a prototyping facility in Woburn, Massachusetts.

Will Panasonic build a new battery factory in 2024?

However, in January 2024, Panasonic's CEO Yuki Kusumi said the battery business will focus on boosting productivity over building another battery factory. South Korean battery manufacturer SK On has created joint ventures to develop batteries with Ford and Hyundai. The company's U.S. subsidiary, SK Battery America, has its own plans.

How much money will automakers invest in battery manufacturing?

Automakers and battery manufacturers have collectively invested and promised to invest around \$112 billion in building domestic cell and module manufacturing. Together, these companies promise to deliver an annual capacity of close to 1,200 gigawatt-hours before 2030, if each factory reaches maximum capacity.

Will Northvolt recycle half of the raw materials needed for cell production?

Northvolt told TechCrunch it hopes to recycle half of the raw materials needed for cell production by 2030. Battery startup Our Next Energy (ONE) announced plans in October 2022 to build a gigafactory in Michigan devoted to lithium-

iron-phosphate cells, AKA LFP batteries.

What is Northvolt's battery recycling program?

The factory will also feature Revolt, Northvolt's battery recycling program, which will have a capacity of 15 GWh. Northvolt told TechCrunch it hopes to recycle half of the raw materials needed for cell production by 2030.
