

New Energy Storage Project Plan

Overview

What is the energy storage strategy & roadmap (SRM)?

WASHINGTON, D.C. – The U.S. Department of Energy (DOE) today released its draft Energy Storage Strategy and Roadmap (SRM), a plan that provides strategic direction and identifies key opportunities to optimize DOE’s investment in future planning of energy storage research, development, demonstration, and deployment projects.

What is new energy storage?

New energy storage refers to electricity storage processes that use electrochemical, compressed air, flywheel and supercapacitor systems, but not pumped hydro, which uses water stored behind dams to generate electricity when needed. Our Standards: The Thomson Reuters Trust Principles.

What is a 2022 energy storage plan?

The proposed plan begins with background on the 2019 Climate Leadership and Community Protection Act (“the Climate Act”) and the 2022 Energy Storage Roadmap (“the Roadmap”) as updated in March 2024. The plan then outlines the structure of the program, with a focus on the Index Storage Credit (ISC) incentive mechanism.

What is a bulk energy storage implementation plan?

The Implementation Plan provides an operating framework for the program, with additional details to be provided in Bulk Energy Storage program solicitations.

What is NYSERDA's energy storage plan?

Accordingly, the Order directs NYSERDA “to include in each bulk procurement a target of 20 percent of long-duration, 8-hour energy storage resources, to move New York towards installing the necessary amount of LDES by the

mid-2030s.”⁹ NYSERDA therefore proposes to procure, within each solicitation, projects in two separate resource categories.

How many energy storage projects are there in the world?

It has 9.4GW of energy storage to its name with more than 225 energy storage projects scattered across the globe, operating in 47 markets. It also operates 24.1GW of AI-optimised renewables and storage, applied in some of the most demanding industrial applications.
