

Nordic lithium battery pack processing

Overview

Who is Nordic batteries?

At Nordic Batteries we assemble and manufacture customized battery- and energy storage solutions to drive your business forward. Based on our market and technological expertise we deliver solutions powering the green shift for key industries. High energy battery module produced in Norway from norwegian battery cells.

Are Nordic batteries looking for a development engineer?

Nordic Batteries are seeking a development engineer for mechanical construction and system design. Factor 47 is operative! The pilot line where Nordic Batteries will produce their first battery modules is now officially open after the visit from former Prime Minister Erna Solberg where she cut the banner to kick it off.

What is the Nordic battery belt?

The Nordic Battery Belt creates a logistics chain and a cooperation network of operators within the Nordic battery value chain. The countries' battery processes are closely connected. Nordic mines, refineries and cell factories are located close to each other, making cooperation easier.

What does a man etruck battery pack look like?

This is what the battery pack for the MAN eTruck will look like. The batteries are the result of complex assembly and real powerhouses: They are made of battery cells, which in turn are grouped into modules and combined in individual layers to form a battery housing (pack). This requires a high level of know-how and strict safety standards.

What is a battery module & pack?

Battery modules and packs for applications with high energy and/or power requirements such as grid stabilization, light trucks and energy storage.

Robust battery containers with batteries and charging solutions for construction, maritime, grid, and other hard-to-abate industries.

Nordic lithium battery pack processing

Nordic lithium battery pack processing

Based on the brochure "Lithium-ion battery cell production process", this brochure schematically illustrates the further processing of the cell into battery modules and finally into a battery pack.
