

North Korean photovoltaic panel components

Overview

Do North Koreans use solar panels?

North Korean households generally use small 50-100 watt solar panels to power lights, TVs, cell phone chargers and other household appliances. Wealthier households use larger 250 watt solar panels to power refrigerators and air conditioners (for around one hour a day).” “Many people in Hyesan are installing solar panels in their new apartments.

Where is photovoltaic power available in North Korea?

Based purely on sunlight, the most suitable areas of North Korea are across the mountain ranges that make up most of the interior of the country. Figure 1. Practical photovoltaic power potential across North Korea. Image: Aditi Sharma/38 North Global Solar Atlas 2.0.

How many people in North Korea have solar panels?

Based on testimony by North Koreans and pictures taken in major cities ranging from Kaesong to Wonsan and smaller towns like Yomchon in North Pyongan Province, the Daily NK estimates that almost 50% of households in North Korea have solar panels.
