

# North Macedonia Anti-corrosion Power Plant Power Generation BESS

### **Overview**

Why did the new government of North Macedonia need securing energy supplies?

Firstly, the Ministry of Energy, Mining, and Mineral Resources needed to address a critical issue: securing energy supplies for the winter. Sanja Božinovska stated that the new Government of North Macedonia inherited a challenging situation in the energy sector and had to make every effort to ensure a reliable energy supply throughout the winter.

What is the Integrated National Energy & Climate Plan of North Macedonia?

The Integrated National Energy and Climate Plan of North Macedonia elaborates on all five dimensions of the Energy Union i.e. decarbonisation (addressing two segments: greenhouse gas emissions and renewable energy sources), energy efficiency, security of energy supply, internal energy market, and research, innovation and competitiveness.

Will North Macedonia become self-sufficient in electricity production?

The vision of the new ministry is for North Macedonia to become self-sufficient in electricity production. According to Božinovska, it is crucial for the country to focus on domestic electricity generation, as it currently lacks new renewable energy capacities.

How will electrification improve the energy situation in Macedonia?

Electrification of the heating and cooling sector, as well as increasing the heat consumption, which are the main priorities in the National Strategy for Energy Development up to 2040 (Energy Strategy), will contribute to improving the Macedonian situation concerning this indicator. Figure 20.

How will natural gas contribute to the energy transition in Macedonia?

Description: Macedonia has an ambitious gasification plan and natural gas is one of the fuels that will significantly contribute to the energy transition up to

2040. In addition, with the implementation of this measure the air quality will be significantly improved. EBRD support for procurement and installation of household equipment (50 mill.

When will a power plant be commissioned in Macedonia?

The objective is up to 2028 this power plant to be commissioned. The natural gas market in Macedonia is liberalized starting from 2015. However, during this period there are only five participants at the wholesale market. In order to increase the number of participants in the wholesale market, the goal is to meet the following conditions:
