Where are solar panels made in China?

Jiangsu Province is renowned as one of China's largest solar panel manufacturing hubs. Located on the east coast, it has the advantage of being near ports, which facilitates the ease of exporting solar panels. The province hosts a multitude of solar panel manufacturers in China, including Trina Solar, one of the world's largest.

Why is China the world's leading producer of solar panels?

China is the global powerhouse in solar panel manufacturing, driving the industry with unparalleled production capabilities and cutting-edge technological advancements. As the world's leading producer, China commands over 95% of the global market for key components such as polysilicon, ingots, and wafers, essential for solar panel production.

Are Chinese solar panels able to circumvent tariffs?

A notable development in trade policy is the introduction of a 24-month moratorium on anti-circumvention duties for Chinese-branded solar panels and cells imported from countries like Vietnam, Malaysia, Thailand, and Cambodia. These countries had previously been seen as avenues for circumvention of tariffs on Chinese solar products.
