

# Pretoria BIPV photovoltaic roof integrated panel equipment

## **Overview**

## What is a BIPV solar system?

Building Integrated System: BiPV Solar Panels forms the roof structure itself, therefore lesser materials required to be transported to site. The gap between panels and roof is also eliminated, preventing the Nested overlapping design, similar to conventional metal deck roofing construction is incorporated.

## What is a BIPV roof?

is a 2-in-1 technology which combine Panel + Metal Roof Building Material) together and mounted on building purlins part of the building itself. BiPV due to its building materials nature, mount tightly to purlins as part of the building, it can cover the full roof space, therefore roof space utilization rate can be often >90% (+20% higher).

How many BIPV panels will be used?

A total of 24 BiPV panels @ 8.4kWp will be used to construct the canopy, along with hybrid inverters and battery system to ensure a Zero Emission solution is achieved. Site is heavily shaded from am to pm. To prevent entire array energy loss, BiPV panels are paired with 4 MPPT micro inverter Location: Kg Tua Melayu, Batam, Indonesia.

Why do BIPV solar panels overlap above each other?

The BiPV Solar Panels are designed to overlap above each other to provide water tightness Building Integrated System: BiPV Solar Panels forms the roof structure itself, therefore lesser materials required to be transported to site. The gap between panels and roof is also eliminated, preventing the.

What are photovoltaic roof tiles?

Photovoltaic roof tiles or shingles are roof tiles with integrated solar cells used for roof covering, either in combination with standard roof tiles or shingles, or as a standalone solution. They are tightly integrated into the roof.

## What is a BIPV product?

Business Case: A collective of Singapore companies are putting in joint effort and know-how to establish a new Modular House Concept industrial standard, where BiPV product is used to spec-in architectural requirement. The BiPV product enables hybrid power system for modular structures and scalable for future deployments.
