

Price of container power generation

Overview

What is a 40 ft containerized generator set?

Originally launched for limited markets in 2021, the 40-ft containerized generator sets were engineered for easy transportation, simple installation and are stackable, offering up to 34% space utilization savings over traditional build designs.

Are containerized generators reliable?

Years of use in the rental, oil and gas, mining and other heavy-duty industries have tested the reliability, usability and durability of our containerized generators. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user.

What is a Tier 4 containerized generator?

Our Tier 4 containerized generators are high-powered —500 kW to 1250 kW— units packaged in 30-foot or 48-foot ISO containers.

What is a containerized genset?

Most containerized gensets come equipped with built-in silencers and soundproof insulation, which reduces noise to acceptable levels for urban or commercial use. Containerized gensets are often designed for “plug-and-play” operation, allowing rapid setup and start-up. This is especially useful in emergency or disaster relief situations.
