

Prices for installing photovoltaic panels in Greece

Overview

The average cost of a solar system in Greece is €3 per watt. To account for the typical energy usage of the average home in Greece, most homeowners require a 4.2-kilowatt system. How much photovoltaic capacity does Greece have?

As of December 2013, the total installed photovoltaic capacity in Greece reached 2,419.2 MWp of which 987.2 MWp were installed in the period between January–September 2013 despite the financial crisis. Greece ranks 5th worldwide with regard to per capita installed PV capacity.

Are rooftop photovoltaic panels subsidized?

Rooftop photovoltaic panels combined with power storage will be subsidized by the state to up to 60% of their cost, an Energy Ministry official told the Renewable and Storage Forum on Thursday. Subsidies are for units up to 10 kilowatts, with the program's details to be unveiled for a period of public consultation within the next two weeks.

What is included in a 3kWh photovoltaic package?

The economical autonomous photovoltaic packages 3kwh include 2 PV panels of 280 watt panels, pure sine wave inverter 800watt / 1000VA - 24V, 4 batteries of 150AH C10-165AH C100, charge regulator 20A PWM technology, installation materials, photovoltaic bases, solenoid panels, and blueprints with instructions for use for the installation.
