

Romania energy storage investment project

Overview

In an accelerated wave of investments, companies in Romania are combining battery energy storage systems (BESS) with solar, hydro or wind energy, or building independent storage facilities. The list includes big names such as Verbund, Engie R.Power, Hidroelectrica. How much will Romania spend on a battery energy storage project?

To achieve this goal, the Romanian government will conduct both tenders through competitive bidding. A total of €79.6 million is allocated for the battery energy storage project. €199 million will be spent on related manufacturing capacity. Of this amount, €149.25 million will be used for new cell production, assembly and recycling facilities.

Will Romania re-launch a battery energy storage tender?

On 8 February, the Ministry of Energy of Romania announced the re-launch of its tender for battery energy storage projects and investments in the manufacturing sector for the production of energy storage equipment and solar panels.

Is Romania reopening a competition for battery storage?

Romania has reopened a competitive solicitation for battery storage for the grid integration of renewable energy, seeking "at least" 480MWh.

Why should Romania Invest in energy storage batteries and photovoltaics?

If Romania can gain an advantage in the energy storage battery and photovoltaic industry and attract industrial capital from inside and outside the EU to invest in this field, it will help the EU to realise an autonomous and controllable sustainable energy supply chain.

How much money will Romania spend on solar projects?

Meanwhile, the remaining €49.75 million is intended for new projects in Romania that would add solar PV cell and module (panel) production,

assembly and recycling capacity to the tune of at least 200MW per year by mid-2026.

Does Romania have a solar PV market?

Our sister site PV Tech has covered Romania's solar PV market extensively. The Ministry also announced a €199 million call to support Romania's battery and solar photovoltaic (PV) manufacturing sectors, also funded through the NRRP, with €149.25 million for new battery production, assembly and recycling facilities.
