

Seychelles Solar Photovoltaic Power Generation System

Overview

Where are the solar power plants located in the Seychelles?

The facilities include the 5MW solar PV plant located in Ile de Romainville, a 3.3 MWh energy storage system located on Mahé and a 33kV system that allows for the safe and stable supply of electricity from the PV power plant to the main island of Mahé. This system helps increase the resilience of the national grid of the Seychelles.

Does Seychelles have a 5MW solar PV plant?

The Republic of Seychelles has inaugurated its second clean energy project, a 5MW solar PV plant with battery storage. The Republic of Seychelles has inaugurated its second clean energy project, a 5MW solar PV plant with battery storage.

What does the Seychelles government do?

The Seychelles Government is committed to providing adequate, reliable and affordable energy to meet future energy consumption needs and to underpin strong economic growth through consumable energy initiatives. The Seychelles enjoy favourable conditions for renewable energy (RE) resources, such as wind and solar.

What is a people-centred energy transition in Seychelles?

An exciting people-centred energy transition is underway in Seychelles, an archipelago of 115 islands off East Africa in the Indian Ocean. Spearheaded by the Seychelles Energy Commission, the PV democratisation 2.0 project is the recipient of the Climate Investment Platform's Thomas Jensen Energy Transition Award.

What is the Seychelles energy plan?

It targets an ambitious transformation and diversification of the Seychelles' currently 85 MW diesel-dominated electricity generation capacity (on Mahé,

Praslin and La Digue), aiming at replacing diesel generators with domestic and international public and private financing.

How does UNDP support the Seychelles Energy Commission?

Through the Climate Investment Platform, UNDP is supporting the Seychelles Energy Commission's initiative to make the adoption of renewable energy accessible to the population that would otherwise not be able to afford to do so.

Seychelles Solar Photovoltaic Power Generation System

'Photovoltaic is the best renewable energy source for Seychelles'

Photovoltaic through roof and farm installations has been seen as the best renewable energy source for Seychelles in its target to achieve 15% renewable energy by 2030.
