

Sierra Leone purchases outdoor power supplies

Overview

Although Sierra Leone has various forms of energy potential, including biomass from agricultural wastes, hydro, and solar power, it remains underutilized. Energy consumption is dominated mainly by that generat.

How many people have electricity in Sierra Leone?

Very few people have access to electricity in Sierra Leone: Approximately 10% to 12% of the urban population and only around 2% of the rural population. Petrol or diesel generators are often used because most of the regions lack a stable public power supply.

Why does Sierra Leone need infrastructure investment?

The Government of Sierra Leone is also seeking infrastructure investment to support expansion of energy distribution and transmission networks. Sierra Leone has good access to natural resources necessary for energy production such as access to viable wind speeds and sunshine for renewable wind and solar projects.

What investment opportunities does Sierra Leone offer?

Sierra Leone offers investment opportunities in several segments of the energy industry including wind energy, solar energy, hydro, and bioenergy. The Government of Sierra Leone is also seeking infrastructure investment to support expansion of energy distribution and transmission networks.

Does Sierra Leone have hydropower?

In Sierra Leone, hydropower generation has accounted for a substantial part of the total electricity generation mix. Currently, hydroelectricity represents 59% of the installed grid-connected electricity generation capacity.
