

Slovenia s new energy storage project incentives

Overview

The subsidy can cover up to 45% of eligible investment costs, or a maximum of EUR 225 per kWh of battery storage capacity. Eligible applicants are companies, sole proprietors, and cooperatives. Grants can be combined with a solar power plant or existing storage units without restrictions. How much will Slovenia spend on solar energy projects?

Data Protection Policy Slovenia has set aside €16 million (\$16.7 million) to support solar energy communities, requiring projects to include at least 100 kW of PV capacity, with or without storage. The program will run until 2027.

How to invest in the renewables sector in Slovenia?

Investment in the renewables sector has been dependent on the availability of financing mechanisms. The Slovenian Energy Agency is the competent authority for tenders for the feed-in support scheme. Power plant operators, awarded by public tender, may choose between guaranteed purchase and operating premium.

What is the Slovenian energy policy?

The purpose of the measure is to accelerate the deployment of investments in renewable energy production and energy storage, with the aim to foster the transition to a net-zero economy. The Commission found that the Slovenian scheme is in line with the conditions set out in the Temporary Crisis and Transition Framework.

What does the European Commission's €150 million scheme mean for Slovenia?

The European Commission has approved a €150 million Slovenian scheme to support the rollout of renewable energy and heat as well as energy storage, in line with the Green Deal Industrial Plan.

Will Slovenia subsidize new self-sufficient PV energy communities?

The Slovenian Ministry of Cohesion and Regional Development has launched a €16 million program to subsidize new self-sufficient PV energy communities. The government and Slovenia's EU Cohesion Policy Program are co-financing the initiative, the ministry said in a statement.

Will Slovenia adopt a new National Energy Program?

Although Slovenia has not yet adopted a new National Energy Program, steps towards its adoption such as Environmental Impact Assessment requirements have been published. These requirements will be considered during the process of the adoption of the new national energy concept as envisaged by the EZ-1.
