

Solar Panel Sun Awning Quote

Overview

What is a solar awning?

Solar awnings offer a combination of practical use and green energy, transforming buildings into power-generating hubs while enhancing architectural appeal. Lumos specializes in designing solar awnings that fit into structures, providing energy efficiency, shade, and style all in one package.

Why should you buy a solar awning?

Enjoy a sheltered outdoor oasis with protection from the sun, UV rays and light rain. Stay cool on scorching summer days, reducing temperatures by up to 20° for refreshing outdoor relaxation. Embrace green living with the industry's first solar-powered smart awning with internal Wi-Fi connectivity.

What makes Furrion solar powered awnings different?

Furrion powered awnings stand out from the competition with our cutting-edge solar-powered technology. Unlike other outdoor awning options that require expensive electrical work to install outlets or hardwiring, our solar-powered awnings harness the green energy of the sun, allowing you to embrace sustainability with flexible installation options.

How are solar canopies & awnings changing how we use solar energy?

Solar canopies, awnings, and walkways are changing how we use solar energy. If you want a simple setup or a custom design, Lumos offers smart, flexible, and efficient solutions. Lumos solar canopies, awnings, and walkways use bifacial panels that collect sunlight from both the front and back.

Why do you need a solar-powered retractable awning?

With your beautiful outdoor space left abandoned, there is wasted potential for gatherings, after-work relaxation and enjoying a breath of fresh air with the family. That's why we created the Furrion Lumina solar-powered retractable awning — your solution to designing your outdoor paradise.

Can you put solar panels on a roof?

Most small-scale solar installations go on the roof, but not every roof is ideal for solar. Luckily, if you have a suitable space, there are plenty of other system designs that you can use for your solar panels. These include ground-mounted solar systems, solar carport, and solar trees – now you can add solar patio covers and gazebos to that list.
