

Solar equipment costs in Switzerland Photovoltaic panels

Overview

A photovoltaic system measuring 30 m² for a single-family home costs around CHF 15,000. The Confederation will pay a one-off grant, currently CHF 2,600. The tax deduction amounts to some CHF 2,900. Acquisition costs of CHF 9,500 remain. (Source: SENS Recycling) How much does a solar system cost in Switzerland?

A normal solar power system for an average single-family home in Switzerland costs around CHF 15,000 after subsidies and tax savings. The higher the self-consumption and the proportion of solar energy produced in the total energy requirements, the faster the solar system pays for itself.

How much does a solar panel cost in Europe?

Referring to the general price in the Europe, a solar panel is 200-400 Euros, and a microinverter is 100 Euros. If you buy two panels, you can realize your solar energy investment plan for less than 1,000 Euros. How to install?

.

How much do solar panels cost in Germany?

According to Lang (2016), the feed-in tariffs for roof mounted solar-panels, with a rated capacity between 10- and 40 kWh, in Germany is 0,1225 € per kWh. This would give a yearly income of:.

Is a solar roof suitable for a photovoltaic system?

Our Solar Calculator analyzes the profitability of a PV system for you. If the roof is suitable for a photovoltaic system, the question often arises: Is the investment worth it?

From a purely ecological point of view, this question can always be answered with a yes.

Are solar panels compatible with a photovoltaic system?

Compatibility with a photovoltaic system is primarily determined by solar radiation, roof orientation, inclination, shading, and roof size. Calculate the profitability of a photovoltaic system with our Solar Calculator – Are solar panels worth it?

Solar systems combined with high self-consumption often pay for themselves after 15 to 20 years.

Should you invest in a solar system?

The investment costs can also be deducted from taxes in most cantons. Solar power from your own roof is cheaper than power from the public grid. You can permanently reduce your electricity costs by 30%. With your own solar system, you become self-sufficient and are less affected when electricity price increases.
