

Solar system quotes in El Salvador

Overview

Is solar energy the last energy resource that isn't owned yet?

Solar power is the last energy resource that isn't owned yet - nobody taxes the sun yet. The use of solar energy has not been opened up because the oil industry does not own the sun. The world, when you look at it, it just can't be random.

Is solar power a good idea for writing a novel?

Solar power is going to be absolutely essential to meeting growing energy demands while staving off climate change. The process of writing a novel begins with a pang, a moment of recognition, and a situation, a character, or something you read in a paper, that seems to go off, like a solar flare inside your head. Atheism is so senseless.

Does the Solar System have an anxiety about its reputation?

The solar system has no anxiety about its reputation. Ralph Waldo Emerson (1872). "The Prose Works of Ralph Waldo Emerson: Representative men. English traits. Conduct of life", p.423 Man must at all costs overcome the Earth's gravity and have, in reserve, the space at least of the Solar System. Konstantin Tsiolkovsky (2004).
