

Specifications and dimensions of photovoltaic energy storage boxes

Overview

How long does a photovoltaic system last?

Applying accurate components is necessary photovoltaic systems. The photovoltaic systems are expected to perform for more than 20years, the reliability and quality of the products should be considered for long service life with optimum performance.

What is a solar power plant enclosure made of?

Optimized for solar power plants. The enclosure was made of metal (SS304) to increase durability. It is designed based on the latest IEC standards and has been certified as CB. (CB/CE 61439-1/2) All components are powered by LS Electric, which has been proven reliable.

Why should you choose LS solar combiner boxes?

As developed based on customers' needs, LS's PV combiner boxes provide optimum connections and protections from the modules to the inverters. High reliability and safety. Optimized for solar power plants. The enclosure was made of metal (SS304) to increase durability. It is designed based on the latest IEC standards and has been certified as CB.
