

# **Taipei Power Grid Energy Storage Station**

#### **Overview**

Jointly developed with Shinshin Credit Corporation, this milestone project significantly enhances grid stability and reliability, reinforcing Taiwan's transition to a more resilient energy infrastructure. The facility officially commenced commercial operations in March.Which energy storage system is the largest in Taipower?

For the Kinmen Island project, Delta integrated its Building Automation Solutions, Energy Infrastructure and Industrial Solutions, and Energy Storage Solutions to complete this 2MW/1MWh energy storage system, which is currently the largest energy storage system of Taipower.

How can energy storage equipment improve the power grid?

Energy storage equipment at the grid side: Strengthen the resilience and flexibility of the grid. Combined with renewable energy to supply peak time at night and stabilize the power grid. Provide power grid functions such as frequency adjustment, quick response, and peak cut. Reach 3,000MW capacity goal by 2030 and proceed the rolling review.

What is E-dreg energy storage facility?

Billion Watts Launches 64MW E-dReg Energy Storage Facility, Strengthening Taiwan's Grid Stability Strategically located within an industrial zone, the facility plays a crucial role in energy shifting and frequency regulation, participating in Taiwan Power Company's E-dReg ancillary services market.

Will Kinmen be Taiwan's first island to demonstrate a smart grid power system?

Kinmen is Taiwan's first island to demonstrate a smart grid power system. The successful experience of this system will guide the construction of smart grids on Taiwan's main island in the future. Ping-Li Chung, president of Taipower, said, "Delta has actively invested in the smart grid field in recent years.

Does Taiwan have a grid resilience plan?

Taiwan is engaged in a multifront effort to add resilience to its electrical grid. The centerpiece of this campaign is the Grid Resilience Strengthening Construction Plan (\[ \] \[ \] \[ \] \[ \] \[ \] \], announced by Taiwan Power Company (Taipower, \[ \] \[ \] \[ \] \[ \] \]) in September 2022.

How will Taipower resilience strengthen the grid?

To avoid such chain reactions in the future, Taipower has instituted the Grid Resilience Strengthening Construction Plan for "promoting distributed grid projects," "improving grid reinforcement projects," and "strengthening grid protection capabilities." The total investment of NTD \$564.5 billion will come in installments over 10 years.
