

Timor-Leste energy storage equipment subsidies

Overview

Why should Timor-Leste invest in solar & storage infrastructure?

José added: “The investment in Timor-Leste’s solar and storage infrastructure is transformative. It will help reduce dependence on fossil fuels while improving grid stability and energy access across the country”. José de Ponte was supported by special counsel Marnie Calli, senior associate Lisa Huynh and solicitor Jeraldine Mow.

What is rural energy policy in Timor-Leste?

A key objective is to ensure that the implementation of the government’s rural energy programs provides equitable distribution of benefits. In Timor-Leste the Secretary of State for Energy Policy is responsible for the design and implementation of the government’s rural energy program.

How will a fuel subsidy affect Timor-Leste?

Inevitably demand for modern fuels, particularly LPG, will increase dramatically in the coming years, as economic conditions improve and a middle class emerges and expands in Timor-Leste. The burden to the government of a fuel subsidy could become huge and unmanageable.

Does Timor-Leste need a capital cost subsidy?

The appropriate level of capital cost subsidy for Timor-Leste will depend on the actual PV system costs at the start of implementation of a full-scale program based on the mechanism discussed below, the estimated total budget requirements, and the source of funding decided upon by the government.

Does Timor-Leste need a roof-top solar energy system?

In addition, most of Timor-Leste's electricity is generated through costly and polluting diesel generators. Australia's Market Development Facility (MDF) and ITP Renewables conducted an assessment of the potential market for roof-top

solar energy systems in Timor-Leste.

What is energy security in Timor-Leste?

1 Energy security is “uninterrupted availability of energy sources at an affordable price”; International Energy Agency. The average payback period for a rooftop PV solar energy system in Timor-Leste is 2.5 years. This is much lower than the global average of 6 to 10 years, due to solar resource and electricity costs:
