

UK telecommunications base station installation costs

Overview

Where can radio equipment be installed in the UK?

Operators may establish, install and use radio equipment anywhere in the UK, in accordance with their Wireless Telegraphy Act licences, issued by Ofcom. Obtaining planning permission for the physical structures that host the radio equipment is handled by the relevant local planning authorities.

Do foundations groundworks install substation bases?

Foundations groundworks regularly install the groundworks for substation bases. We can work alongside an appointed earthing team or we can supply the earthing through our partners. You have probably found this page as you are either weighing up the options of going direct with either UKPN or SSEN or you have committed to them already.

What services does a wireless tower & mast provide?

From greenfield sites to rooftop installations, we provide full project delivery, including structural engineering, planning support and compliance with all health and safety regulations. Our towers and masts support wireless infrastructure across the following UK sectors: Secure radio tower builds for military, emergency services and surveillance.

What is a 5G tower & mast construction service?

Whether part of a private 5G rollout, point-to-point backhaul, or public safety comms, our tower and mast construction services deliver secure, long-term infrastructure, designed for resilience and built to industry standards.

Can a substation be installed without a trench?

Without trenches the cable cannot get to the sub station and without excavating the base the sub station will not be able to be installed. With UKPN they require for laying the cables to and from the substation all excavations, supply and installation of ducts, sand blasting, stage backfill, warning tape

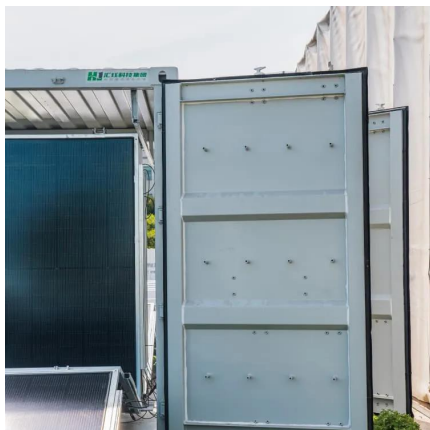

and reinstatement.

What kind of door hinges do you need for a cellular base station?

ure, or a cellular base-station equipment use nylon material where it's offered.
