

Ukraine assembled outdoor power supply

Overview

How repower Ukraine keeps power supply in Ukraine?

Renewable energy generation has been maintaining power supply in Ukraine through the ongoing Russian invasion. With the effects of the Russia-Ukraine war on the global energy market well documented, RePower Ukraine has been working to maintain power supply on the ground by installing solar PV and battery storage.

Is Ukraine ready for a decentralised energy system?

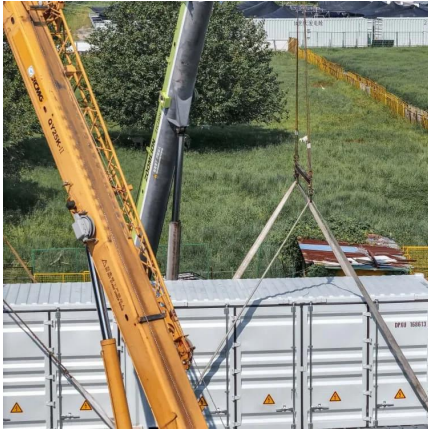

Acknowledging that renewable energy will play a crucial role in ensuring energy security and sustainability for the nation, RePower anticipates a shift in Ukraine towards decentralised (and thus more resilient) energy systems. The nation has strong potential for wind and solar generation.

Who is repower Ukraine?

RePower Ukraine initiated, managed and implemented the rooftop PV, which is designed for self-consumption. Chinese company Jinko provided solar panels, inverters and batteries for the project free of charge.
