

Uruguay Solar Photovoltaic Panel Project

Overview

Uruguay is poised to bolster its renewable energy capacity by integrating an additional 200 MW of solar photovoltaic (PV) projects into its grid by the year 2025. When will a 75 MW solar project start in Uruguay?

Uruguay's National Administration of Electric Power Plants and Transmissions (UTE) has kicked off a tender for a 75 MW solar project in Cerro Largo, with operations set to begin between March and June 2028. The bidding process will close in January 2026. From pv magazine LatAm.

Does Uruguay have a solar park?

UTE is also building its first 32 MW solar park. At the end of 2023, Uruguay had approximately 297 MW of installed PV capacity, according to the International Renewable Energy Agency (IRENA). This content is protected by copyright and may not be reused.

Does Uruguay have solar power?

Legislative support for solar power has existed since 2013 and the total installed capacity of distributed solar generation reached 270 MW in 2022. Uruguay receives an average 1,700 KW per square meter of sunlight a year, on a par with Mediterranean countries although solar represents only a fraction of the country's total electricity production.
